

## LEAD SERVICE LINE REPLACEMENT

THE CITY OF CAPE MAY IS REPLACING ALL LEAD AND GALVANIZED STEEL WATER SERVICE LINES IN THE CITY.

A water service line is the pipe that connects your home to the water main in the street. A portion of the line is owned by the City of Cape May while the rest is owned by the homeowner.

If you are reading this and would like to self identify your service line material please scan the QR Code below:

If you have questions or want more information on Lead Service Line Replacement please visit https://dep.nj.gov/lead/or the City of Cape May's website at: https://www.capemaycity.com/departments/WaterSewer

With support from:

# LEAD SERVICE LINE REPLACEMENT PROJECT OUTLINE

#### What is happening?

- City of Cape May and DeBlasio Associates field staff will be going door to door performing visual inspections (without any digging or disturbance) over the coming months to determine service line material.
- They will have name tags that identify them as city employees/ contractors and will be wearing high-visibility clothing.
- Access to a crawlspace or a basement will be needed to accurately determine your water service line material.
- Once all service line material has been identified, all lead and galvanized water services will be replaced.
- Replacement of Lead and Galvanized services will be done for FREE. Homeowners will not have to pay to have their galvanized or lead service line replaced.

#### How can I help?

- Homeowners can scan the QR code on the opposite page and follow the instructions to self report their service line material.
- You can email LSLR@Deblasioassoc.com with any questions.

### How will I be contacted?

- In-person field inspectors will be going door to door to speak directly with all water customers
- Information about Lead Service Line Replacement will be mailed to water customers
- Door Hangers will be left at homes with information about Lead
  Service Line Replacement
